

LEGEND

CompactFlash (CF)

High Performance Digital Media
for today's portable devices.

CompactFlash is the world's most popular removable mass storage device. The CompactFlash card is about the size of a matchbox. The card was designed based on the popular PC Card (PCMCIA) standard and can easily be slipped into these slots with the use of a low-cost adaptor.

CompactFlash Media Cards from Legend bridge the gap between larger storage requirements and affordability. Users of digital cameras, PDAs and other digital devices can quickly and easily download or transfer digital files between various digital devices and the Internet.
