

Legend Corporation Releases Memory for Mobile Telephones

Adelaide, November 22, 2005 — Legend Corporation Limited (ASX:LGD) an Australian digital technology company, has announced the release of a range of Multi Media Card (MMC) flash media products suitable for most new mobile phones. The new product range will service the rapidly growing mobile phone sector that requires additional storage to support multimedia functionality such as MP3 music players, digital camera's, email and games. In an Australian first, the MMC flash media cards will be manufactured locally at Legend's Adelaide production facility as well as at the company's Singapore facility. Legend's CEO Mr Bradley Dowe says that this new product range is a prudent next step for the company. "Legend is excited to be addressing this rapidly growing market and we see a great opportunity to lever new business within the telecommunications sector," says Dowe. This new product range services the rapidly grow-

About Legend

Legend is a digital technology company that makes and sells memory and memory based consumer electronics products to customers across the globe. Legend's operations extend throughout Australia, New Zealand, South Africa, Singapore, Hong Kong, Thailand, Taiwan and Europe. Legend was established in 1989 and commenced manufacturing operations in 1993. Legend has manufacturing facilities in Adelaide (South Australia) and Singapore. Legend has a broad range of clients including Acer, Sony, Xerox, NEC and Dell, through to major Australian based computer systems integrators such as Volante, ASI and Optima. The Legend Digital range of consumer electronics offer customers innovative technology at prices they can afford and is available at major merchandising chains including Dick Smith Electronics, Kmart, Myer and Harvey Norman.
