

SD Memory Card

High Performance Digital Media Cards
for today's portable devices.

Legend's Secure Digital™ (SD) Memory Cards provide secure mobile data storage for digital portable devices such as digital music players, cellular phones, handheld PCs (HPCs), digital cameras, digital video camcorders, smart phones, car navigation systems and more.

SD Memory Cards weigh approximately two grams and are only the size of a postage stamp yet boast high data transfer rates, various storage capacities and optional lock switch on the side to prevent accidental overwriting. Solid-state technology provides reliability and durability because they are built from non-volatile memory components which have no moving parts to break or wear out.

So you can now write/copy/download/backup your data quickly and easily between various digital devices, a computer and the Internet.
